

This family of chart-holder, issued from products operated on aircraft for more than 20 years, is mainly dedicated for helicopter application.

This equipment is Lighted by bulb (BA9S) monitored by push-button through an electronic potentiometer.

Installation on helicopter is achieved by mounting interface designed on customers requirements and adapted to the application.

#### TECHNICAL DATA

Dimension	98 x 133 x 32 (without mechanical interface)
Mass:	Less than 0.4 Kg.
Finish:	Black or Grey color. Logo on request
Voltage:	28 VDC.
Current:	Less than 0.120 A at maximum brightness
Power Consumption:	2.8 W
Dimming:	0 – 100 % monitored by push-button.
Electrical Interface:	Two wirings of 1.5 meters length.
Mechanical interface :	Design on customer requirements
Light Source:	Bulb BA9S.
Useful Life:	20 000 Operating Hours (excluding bulb).
Environmental Spec:	Tested & qualified according to RTCA DO160D
